

# Secure Business Continuity Assessment

Are you ready to work remotely securely?

# Change comes along with **new risks**

The COVID-19 pandemic scenario of recent years has forced many organisations to quickly activate their business continuity plans, and design emergency actions in order to guarantee the continuity of operations.

The new context obliges businesses to outplace their workers from the Office Locations, namely adopting agile 100% homeworking scenarios to maintain their workers safe and break the chain of transmission.

Although this scenario allows organisations to continue operations, they had to quickly adapt and this opens up new risks that are rapidly been exploited by cybercriminals.

# What should organisations do about it?

A structured and quick action plan is required to minimise the windows of opportunity.

According to best practices, namely ISO 27001:2013, organisations should run risk assessment programs regularly or whenever a **significant change has occurred**.

Organisations should as **quickly as possible assess new potential risks** that this scenario poses for their business and information, resulting from the displacement of their teams.

Moreover, organisations shouldn't limit the risk assessment to their internal teams, and **this assessment should be extended to their 3rd Parties** that assure important business processes.

**Risk Assessment is the upmost important management process to proactively identify risks taking into consideration threats, vulnerabilities and potential impact resulting from a successful exploitation.**

**Addressing risks as early as possible will allow organisations to minimise the windows of opportunity and to mitigate any potential weaknesses before they result in impacting incidents.**

# Why running the risk assessment with **Devoteam Cyber Trust?**

We are a recognized company specialized in Cybersecurity services, making us the right partner to help your organization to quickly ensure and draw a mitigation plan for this scenario.

This service leverages our experienced Consulting and Pentesting Teams, along with our Assessment Module (IntegrityGRC) to provide accurate and quick deliverables.

The assessment program will not be limited to the infrastructures and services made available to teleworkers, but will also assess the controls that have been defined and implemented at endpoints.

As a result the assessment program will allow organisations to have an overview of identified risks, their severity levels, and recommendations for themselves and also the risk posed by their third parties.

Organisations will also be able to efficiently draw mitigation plans, extract reporting and manage risks on our GRC Platform that doesn't require any licencing under this service.

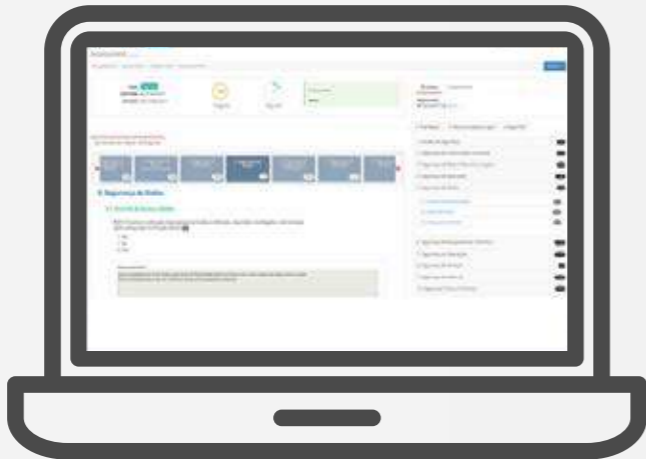

Know your risks.  
**Be Smart. Be Secure.**

# Who

**Company Environment  
& Outplaced Teams Personnel**

**Third Parties Environment  
& Outplaced Teams Personnel**

IntegrityGRC platform will be leveraged in the Assessment and 3<sup>rd</sup> Party Risk Assessment to obtain quick results

# What will be assessed

- Secure Remote Access**
- Cloud or In-house Service Access**
- Endpoint Security**
- Endpoint Environment**
- Authentication**
- Encryption**
- People Awareness**
- Incident Response Readiness**
- Monitoring Processes and Operations**
- PenTesting**
- ...

# What are your **benefits?**

We take advantage of our **15 YEARS EXPERIENCE** on CyberSecurity Services to outline a very effective and ready to deliver service to help organisations to quickly assess their risks under this new business context.

**ENVIRONMENT  
SPECIFIC BUT  
VENDOR AGNOSTIC**

As a vendor independent provider for CyberSecurity services we focus on your needs and bring in our practices combined with adequate tools, people and methodologies.

Utilizing our ready to deliver service you benefit from our broad research and real experience from dozens of Risk Assessment Processes that we have delivered over the course of last years.

**SAVE TIME AND  
EFFORT & REDUCE  
RISK**

**Devoteam Cyber Trust** is the right partner to support your organisation in this intense and evolving threat landscape, with best-in-class Offensive Security Services.

This is why dozens of medium-large clients from over 20 countries worldwide trust our services.

We are happy to share **our experience** and help you improve your **cybersecurity practice**.

**Balanced risk management requires a solid strategy.**
